

Quest 1

We are dreaming big, and yet we are starting small.

Use Python code and for loop(s) to print out a simple pyramid structure.

Beware, you will have to use at least 1 for-loop to pass this quest.

Once you've completed this level, have it verified by any of the volunteers who will then grant you the next thrilling quest.

Remember, true champions uphold integrity, they exemplify fair play and excellence. Please don't google the answers.
